

NEW YORK WIRE

STIFF SCREEN

## Ideal solution for roller applications

Great for all retractable windows and doors

Stronger ideas for a sustainable world

## New York Wire Stiff Screen

New York Wire Stiff screen is fiberglass insect screen that provides durable and long-lasting protection against all types of insects. This screen is stiffer than standard insect screen to provide excellent usability in retractable applications.

We offer a standard stiff screen and an enhanced visibility stiff screen called ViPer – Vision Perfect stiff.

ViPer Stiff Screen is the clear choice for premium quality and clarity:

- Thinner yarns and tighter weave compared to standard fiberglass
- Unique construction allows for sharp and brilliant visibility through windows, doors, and all retractable applications
- Better light transmission, airflow, and insect protection than standard

Both standard and ViPer stiff screen are ideal for all retractable window, door, and enclosure applications. The attractive appearance, excellent outward visibility and easy installation allows for a wide variety of additional applications.

*NYW Standard stiff screen is available in charcoal and grey while ViPer stiff screen is available in charcoal. Both products are available in various widths and lengths that can be customized to your application.*
